Mobile seminar furniture
brainstorm

The art of linking minds.

In the modern globalised economy, knowledge is our productive capital. Knowledge that needs to be compiled, shared, and exchanged in order to grow. Sedus brainstorm has been developed to create the ideal conditions for these processes. The comprehensive, flexible range of furniture

and accessories promotes knowledge transfer, team, and project work within the company in its own unique way. By means of intelligent functionality, encouraging communication, and the emotional atmosphere of productive well-being: properties synonymous with Sedus Place 2.5.

Design: speziell®

Forging new links: Sedus personal desk.

When it comes to designing workshops, brainstorming sessions and seminars, the one-person table on castors opens up a whole new range of opportunities. The tables can be freely positioned within the space, for swift re-grouping as necessary. The desktop is optionally height-adjustable. As such, a wide variety of teaching approaches can be realised, and creativity within groups

specifically fostered. Moreover, every process is characterised by movement, which is not only good for the brain but the back as well. Particularly convenient is the large table-top and the open design, featuring a central column and lateral supports to ensure plenty of leg room. The tables are stackable, allowing you to create more space as necessary by pushing them together into a compact group.

A unit of thought.

Thanks to its ingenious concept, the personal desk actively promotes learning. The mobile table is stackable and can thus be parked to save space, features optional height adjustability, and is truly versatile.

Activate your synapses: brainstorm stacking table.

Dynamic workshops or conventional teaching, spontaneous project meetings, or intense discussions: these tables accommodate everything a company could need for successful teaching and group processes. A whole spectrum of configurations can be simply achieved and just as easily changed again.

Interfaces. The tables can be linked at the sides or at the front, thus allowing block or row formations.

Fitted with castors, the tables are especially suited to quick turnarounds in multifunctional spaces. Depending on the application, various solutions exist for swift access to electricity, data networks, and the necessary conference technology.

Practical. Thanks to the fold-up leaf design, the mobile tables are easily stacked and moved to one side.

Setting a trend: brainstorm individual tables.

Conventional individual tables in the Sedus brainstorm design provide the ideal basis for knowledge exchange in training and meeting rooms, but also in informal meeting points such as in the bistro or break-out rooms. Upon request, the tables may be fitted with two castors; they can also be linked together. Modesty panels covered in high quality fabric are an option which serves to heighten the visual appeal.

“Roll”-play. All tables are available with optional castors for flexibility of application and swift turnarounds.

Privacy. Fabric-covered modesty panels are available in 12 attractive shades.

First-class for presentations. The mobile beamer desk can be optimally wired up and aligned to the projection surface.

Convincing solutions.

All brainstorm components allow for easy power and data access, either in variable use in multifunctional rooms with varying numbers of participants and types of work or with built-in solutions for fixed installation, depending on the requirements.

Electrical connection box. Flap with brushes, cable tray for mains adapters or multi-socket modules.

Spontaneous. Adaptive media modules can be simply clipped on without taking up space on the table top.

Networking. The "Point" electrical connection unit provides connections for mobiles, laptops and tablet PCs.

Child's play. The folding mechanism of the stackable tables can be easily activated with the ergonomic handle.

Good management.
Cable clamps allow simple and safe management of the cables for the built-in socket modules.

Connected. In just a few moments all tables can be quickly linked, optionally at the front end or on the long side.

Elegantly solved. Perfect functionality and attractive appearance: the desktop of the personal desk can be tilted, the height is optionally adjustable. With the personal desk, beamer desk and lectern the castors are integrated into the chrome base.

Flexible. With the beamer desk the device stands on a sliding panel. Perfect cable management keeps things tidy. Thanks to the table's continuous height adjustment, the projected image can be easily adjusted.

Promote exchange.

Four-leg frames are available in either a chrome finish or powder-coated in white aluminium and white.

The stacking table, personal desk, noticeboards and coat rack feature white aluminium powder-coated frames and white or polished aluminium feet with a white steel column.

Sustainability down to the last detail.

Sustainability and quality “Made in Germany” have been basic corporate principles at Sedus for more than 50 years. These principles are embodied in Sedus brainstorm and reflected in the way we work: designing products which are recyclable, using ecologically tested materials, conserving resources, being energy-aware in our manufacturing and conducting ongoing quality tests.

For example, when producing the veneered brainstorm desktops only selected woods such as beech, ash and oak from sustainably managed forests are used. State-of-the-art, energy saving and environmentally friendly production of the steel and aluminium components is also part of the quality and sustainability philosophy at Sedus.

Further information is available at www.sedus.com/se/en/philosophy/ecology

Innovative laser edging. Seamless edge processing of the highest quality creates a durable, attractive and environmentally friendly end product.

Powder coating instead of paint finish. We employ the more eco-friendly and higher quality powder coating for finishing and protecting against rust.
